

# Dentistry on Dundas Nominated Best Dental Office

"Dentistry on Dundas" is pleased to offer a variety of dental specialists and services in their modern facility in downtown Whitby. With a periodontist (gum specialist), an oral surgeon (wisdom teeth removal), Endodontist (root canal specialist) and a dentist who provides dentistry while you sleep, their combination of general dentists and specialists provide comprehensive care to create and maintain beautiful smiles.

"Our patients find it very convenient having all of their dental needs addressed in one convenient location," says Dr. Steven Millman. "In addition, we also offer convenient hours providing evening and Saturday appointments."

"Dentistry on Dundas" prides itself by staying on the cutting edge of technology. New state of the art scanning technology using the iTero is now available. This digital scanning technology replaces the need for those putty impressions usually used for crown and bridge work. It creates a 3D picture of the area, which is then emailed to our lab. The lab uses this image to mill out your new crown or bridge all through the use of computers.

Drillless dentistry, where often no freezing is required, is popular with both adults and children. For those that do need freezing, a painless injection technique using a computerized controlled local anaesthesia delivery system called "The Wand™" is offered. Orthodontics is also available. You can now straighten your teeth with a series of custom-made, removable and nearly invisible aligners called Invisalign.

Digital radiography has also replaced conventional x-ray technology. With the advantages of faster image viewing seen on a computer monitor in every treatment room. Digital Radiography is the state of the art.

Dentistry on Dundas has gone 3D! Cone beam technology has allowed them to take three-dimensional images

to help map out implant placement, TMJ evaluations, evaluate pre-operative extraction sites, detect infections and more. This machine has vastly improved treatment planning and diagnosis.

Your dental appointment can be an enjoyable event at Dentistry on Dundas. They have set up their office to allow patients the opportunity to watch their favorite TV programs while being treated. You can check out their new personal cinema glasses offering a great selection of movies and shows from Netflix. These glasses will transport you from the dental office to the movie theatre in minutes! Their goal is to provide the most comfortable, enjoyable experience for everyone.

The doctors and staff at Dentistry on Dundas have been part of the Whitby community for over 26 years. Through various hockey, baseball and lacrosse sponsorships, as well as the annual "Dentistry on Dundas Fireworks" display on Harbour Day, they have shown great commitment to the Durham Region.

Every year each of the Whitby High Schools present a \$500.00 "Dentistry on Dundas" academic scholarship to a deserving student. In addition, they are proud supporters of many other community programs and charities.

"We are committed to our patients and this community," explains Dr. Librach.

Still afraid of the dentist? Well you don't need to be anymore. Dentistry on Dundas is now providing dentistry while you sleep. You can sleep your fears away, while we take care of all your necessary dental health needs. No more excuses. Call us today and get that smile you have always wanted! 905-666-1555
